Leverage LinkedIn Automation:

LinkedIn is an ocean for getting B2B clients.

First Revamp your LinkedIn Profile and then start outreach to ideal client

An Ideal profile includes a Professional HeadShot, eye-catching Headline and a very brief About section with an E-book or pdf.

Start using extensions like LinkedIn Helper and Leonard which automate the process of connecting with your connections.

After the installation of the extension, start broadcasting messages to your ideal prospect. The extensions have options to customise every single message based on first name, company name, industry etc

Golden Tip - Don't sell your Product / Service in 1st message. Be generous, share your knowledge and Schedule a calendar appointment.

Be active and share your knowledge but not service.

If you are really confused with Title, then don't worry We'll simplify it for you.

- You should always have an ideal customer avatar that you want to chase for like a dentist, coach, SAAS product owner, etc. When you have an ideal customer avatar then check out the Place / People they hang out. It can be anywhere Online / Offline.
- Your goal is to get connected with your client

on a similar forum sharing similar interest.

Target Specific Area and a star
Outreach:

Well, all the social media marketing guru say you have to go out and Pitch for your client. But they never say, whom to pitch, how to pitch and where to pitch but in this hack we will layout a step by step process that will help you land a client:

- **Step 1:** Define Demographic
First define an exact area which you want to focus for generating businesses. For example: We focus for Clients only in specific countries like U.S, U.K and Australia, so in order to get our ideal client we narrow down our area Country >>> State >>> City >>> Area. So, at a particular moment we focus on only one area of 30 - 40 miles.

- **Step 2:** Make a List You don't need to shoot arrows blindly to get the client's but there are proven processes for it. When you have defined an area to focus on. Use Google Maps, D7 Lead Finder, Justdial, Yelp to get Email id, Phone No. and other business information. Don't forget to collect all this information on a google spreadsheets. Also make sure to segment them like Restaurants, Gym, Club etc

- **Step 3:** Send then Value Based Email with CTA Business owners get tons of emails on a day to day basis so your email should stand out from the crowd. Try giving value in your emails like a social media Report, Free consultation call or a promotional video for the business. Always your intention to send an email is get attention and then get on a call. Well for me this process is taken care by Chatbot

- **Step 4:** Close over the call or Meeting if possible. After so much efforts focus on closing your client over the Skype call or Zoom Call. If you are chasing clients in U.S, U.K and Australia then always while pitching a client show them what you can actually do. In order to show the value, the best tip is sharing your screen and show live the things you can do.
